Summary

I am a Full Stack Developer with 7 years of experience building scalable, high-performance web applications across diverse tech stacks. I am passionate about mathematics, with strong problem-solving skills and a solid ability to design efficient algorithms and logical solutions.

- Expertise in frontend development using HTML, CSS, Tailwind CSS, React, and Vue
- Strong backend experience with Node.js (Express, Nest.js, Adonis.js) and PHP (Laravel)
- Experience designing and developing SAAS Apps, Chrome Extensions, Plugins, Integrations, RESTful APIs and scalable architectures
- Proficient in working with relational and NoSQL databases including MySQL, PostgreSQL, MongoDB, and Redis
- Experience using AI tools to improve development speed, automate workflows, and increase productivity

I have strong communication skills with experience working in cross-functional and remote teams. I am a problem solver and take pride in my ability of focus on details, identifying issues quickly and delivering effective solutions.

Technical skills

Core	HTML, CSS, JavaScript, TypeScript, jQuery
Frontend	React, Next, Vue, Svelte, Tailwind CSS, Material UI
Backend	Express.js, Adonis.js, Nest.js, PHP, Laravel
Database	MySQL, PostgreSQL, Redis, MongoDB, SQLite
Testing	Jest, Cypress, Puppeteer
Others	Git, Typing, Docker, Bash Scripting, Apache/Nginx Configuration, JSON, Rest API

Education

University of Gujrat

Bachelor's degree, Computer Science

2017 - 2021

Experience

Fullstack Developer

Turing

Feb 2023 - Feb 2025 (2 years)

Worked as a Fullstack developer at Johnson & Johnson through Turing. I was part of a team to develop and maintain a business-critical internal application which used React + Node tech stacks and was configured to be Synced with another App based on Claris FileMaker. I worked as the primary resource for the React + Node application where I performed all the development for new features, debug & fixed issues, and maintained the documentation.

Fullstack Developer

WADIC

Mar 2022 - Feb 2023 (1 year)

Worked as a Full-time (on-site) Senior Full Stack Developer at WADIC, a services-based company where I had the opportunity to work on a variety of projects across different domains and tech skills.

My role involved end-to-end development of web applications, where I extensively used PHP, Laravel, React.js, Node.js, and JavaScript/TypeScript. I was responsible for developing responsive frontend interfaces, scalable backend services and designing RESTful APIs.

Freelance Web Developer

Upwork/Freelancer

Jan 2019 - Mar 2022 (3 years 3 months)

Worked as a Freelance web developer. Started as a WordPress developer and then moved towards HTML, CSS, JavaScript, and PHP (along with React & Laravel). I successfully completed several projects and gained a good reputation. I was selected as a Top-Rated Freelancer on Upwork and held this badge for over 2 years.

Side Projects (few examples)

- **Omega Analytics**

SAAS app to rethink Analytics, Meaningful Charts – No BS (<https://omega-analytics.syedabdullah.dev/>)

Dec 2025 - Ongoing

Started a SASS app to help simple Woocommerce/Shopify stores with the order analytics. By showing where the orders are coming from in reference to landing pages, utm_sources, referrals and helping with taking decisions based on the data.

Skills used: TypeScript, JavaScript, Node, React.js, Laravel, Tailwind CSS, SCSS, React Context API, User Authentication, API, Adonis, Postgres, Inertia, SSR

- **Context Merger**

Vs Code extension (<https://marketplace.visualstudio.com/items?itemName=SyedAbdullah.context-merger>)

Feb 2026

Developed a Vs Code extension to copy files easily to share context with AI and LLM tools. It adds an option to Vs Code where you can simply select multiple files and folders, right click and select the Merge Files option, and it will merge all files with correct folder paths ready to be shared with the AI tool.

Skills used: TypeScript, JavaScript, Node, Git, NPM, Tooling

- **School Management Software**

Jan 2025

Developed school management software with proper Authentication and Login functionality for a local school in my area using React + Laravel combo.

It includes Students and Faculty Management and has modules to manage registrations, finances, progress reports, assignments, generate reports and results and much more!

Skills used: React.js, Laravel, Tailwind CSS, SCSS, React Context API, User Authentication, API

- **DarazScout**

Chrome Extension

(<https://chromewebstore.google.com/detail/darazscout/heffmihfiilcadjdebaijhmbbccdmigg>)

Jan 2021

Skills used: JavaScript, Chrome extension Development, Datatables, API Integration, React JS, React Context API, User Authentication, API
